GARDEN PANEL

"Not every wall needs to have pictures, but hanging a large picture over a sofa or mantel will give exciting scale to a room."

Originally hand-carved in a little village outside of Semarang, near the Java Sea, this bas relief mural depicts a stylized garden of the Art Deco Era. This cast plaster piece with aluminum reinforcement has a matte white finish and is made with exterior grade plaster that will withstand the outdoors but is also suitable for indoor use. It has an integrated wood cleat for hanging and is primed with oil paint. Similar to all painted surfaces exposed to the elements, panel may have to be repainted with an oil based paint as necessary to ensure full protection.
