Kravet Search 2009

The new Kravet search is best viewed on Internet Explorer version 7.

1 FINDING A PRODUCT

To find a product in our database when you don't have the pattern number, you may narrow down your search by choosing colors, design styles, types and collections.

Hold down the CTRL key to make multiple selections from each search field.

If you choose not to select any criteria, the search will display ALL the imaged SKUs from that product line.

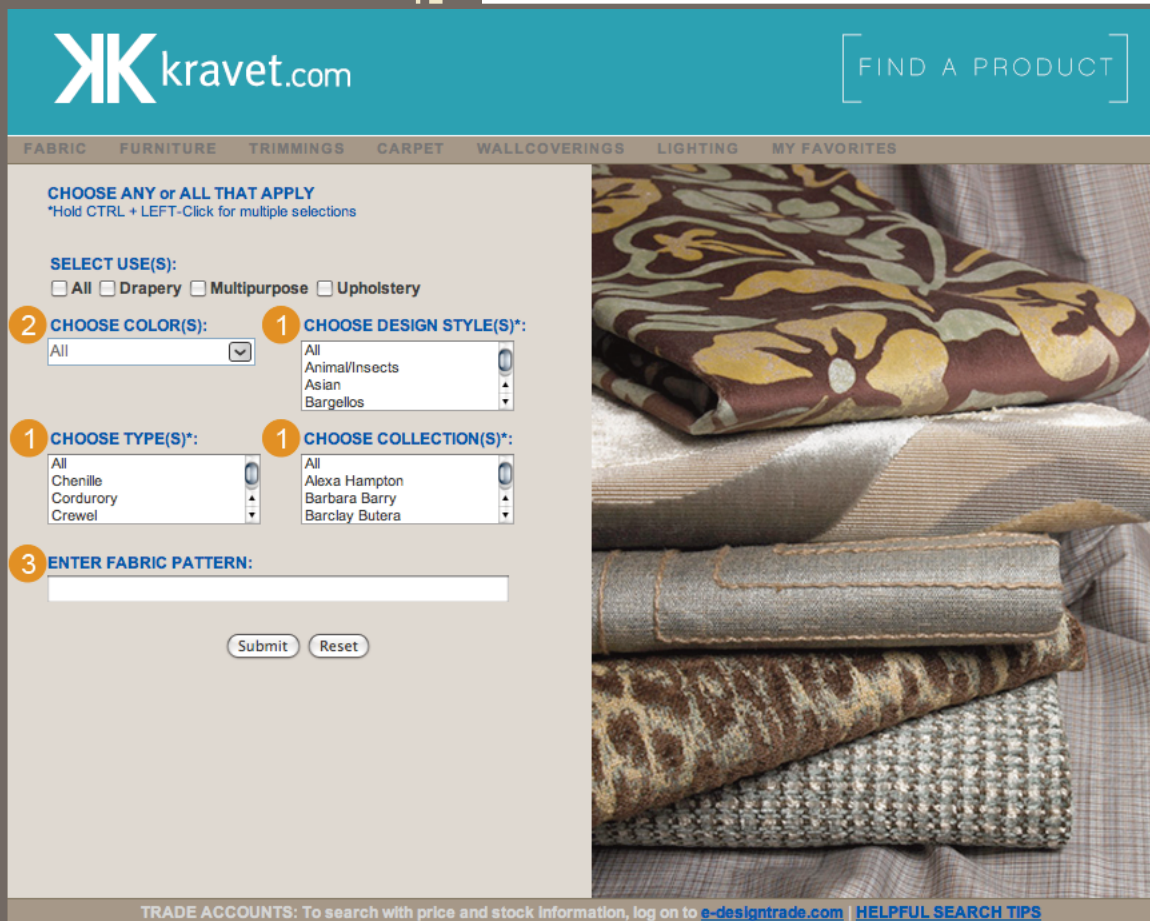

2 CHOOSING COLORS

There are three options for selecting color:

- Color palette - Select from 408 colors
- Use my photo - Upload a photo, then select the specific color on your photo. The search will be based on the selected color.
- More Colors - Drag the slider on the color index bar, then move the circle to the desired shade and hit OK.

3 ENTERING A SPECIFIC FABRIC PATTERN

- Search by pattern. For example, 27924
- Search by pattern and color (separated by a dot). For example, 27924.1619
- Search by name. For example, Velvet Garden Cognac
- Search by Kravet product feature. For example, cotton, wool, up the bolt, heavy duty, UFAC Class 1, railroaded, etc.
(If your search does not provide any results, refer back to number 1).

The screenshot shows the Kravet.com search interface. At the top left is the Kravet logo and the text 'kravet.com'. To the right is a search bar with the text 'FIND A PRODUCT'.
