

JONATHAN ADLER

FOR KRAVET CARPET

Jonathan Adler's first carpet collection for Kravet Carpet includes a beautiful and unique selection of in stock area rugs offered in simple and sophisticated geometric designs. These designs are available in two styles. One is a hand-knotted cut pile wool area rug that is dyed by hand using vegetable and chrome dyes, resulting in natural irregularities for a one-of-a-kind antiqued look that adds depth and a strong gradation of color. The second available construction is hand-knotted using undyed natural hemp and bamboo silk, which features a beautiful tiger's eye striation and amplifies the beauty of the fibers. These natural color variations, weave lines and striations add to the beauty of these simple and striking designs. All rugs are available in stock in a range of sizes, making them ideal for any timeline and budget.
