

LAUREN STOOL - STRIPED COTTON/GREEN

"Place stools under tables or in front of a fireplace for extra seating when needed."

Stools are fantastically versatile to use in a seating arrangement. Encouraging nearness and lending itself to a casual and relaxed conversation, the Lauren stool is a great example of this. With its honey stained finish, ebony detailing on the apron and turnings on its legs, this piece will slot into a more modern space or traditional decor.
