Williams Bed, Queen–BLHUPH45-Q

DESCRIPTION

66"W x 86"L x 58"H

From the floor to the top of the side/foot rails: 12"

From the floor to the bottom of the side/foot rails: 5-3/4"

Rail height: 6-1/4"

Distance from top of boxspring slat to top of side/foot rail: 4.125"

We normally suggest low profile box springs, a box spring sitting on top of the wood slat supports would be about flush with the top of the side/foot rails. So, to estimate the height from the floor to the top of the mattress on an assembled bed a designer should add 12" + [mattress height].
