## Recommendations for D'Arts Collection

- Though there are numerous wallcovering hangers, most of them are not qualified to hang scenic wallcovering. Brunschwig & Fils recommends a professional muralist.
- To insure proper installation, please refer to our installation instructions.
- If advised by your muralist, in certain instances first install paper liner, muslin next, and then another application of paper liner. For further information, please refer to our installation instructions.
- **D'Arts Wallcovering** may be purchased either standard or in custom sizes.
- **Standard Scenic Wallcovering:** Standard designs are available in standard panel heights of 6', 8', 10' or 12'. Standard panel width is 36". Simply specify design name and number, panel height, desired panel number(s), ground material and ground color.
- **Custom fitted designs:** You may specify a series of custom sized panels to fit your room exactly. The muralist is responsible for supplying Brunschwig & Fils with site measurements, elevations and color photographs of the space to insure an accurate design layout, as these murals are created per order. Our studio will submit a drawing of the entire order denoting in full detail the design layout for your review and approval.
- **Custom designs** are available. You may change *any* element(s) on the panel and even create your own design. We can work with your photographs, paint samples and/or fabric to help create *art for the walls*.
